

Reflection

From this article. We know that the problem of student loans is a burden for teachers. We solve the problem in this way, it will solve the problem that the teacher is not enough income to pay. It also encourages more rural teachers to develop rural areas. This solution should be able to help people interested in these professions, because in addition to completing work, there are also ways to help pay off the debt to those who do not need to worry about that. The salaries must be divided into one to pay the debt and then to keep it for personal use as well. In my opinion, this policy is good to solve the problem in the long term.
